Nothing is Impossible - if You Start to Do it.

KnowSeek.Ai

Stop looking. Find your own knowledge and use it.

DocSeek.Ai

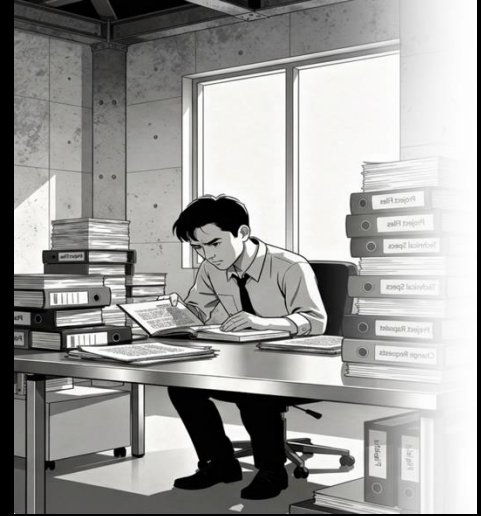

PartSeek.Ai

NormSeek.Ai

CostSeek.Ai

Knowledge Exists. Nobody Can Find It.

- Engineers know - answers exist inside the building.
- Data is trapped in old folders and paper files.
- When experts leave, their knowledge vanishes.

The knowledge is there. It's just invisible

Hidden Profit Killers

Why waste money on solved problems?

Every day, engineers lose hours searching for knowledge that already exists.
And developed in available products

- 20% of working time is spent searching for information.
- 2× teams solve the same problem twice without knowing it.
- €Zero invested in capturing that knowledge. Until now.

Where is the latest OEM spec?

Do we already have this part?

Offer based on known parts?

Which version is current?

Which norm applies here?

KnowSeek.Ai

One system

Every answer

On your machine

Worst case scenario?

Who else is using this?

Can we combine orders?

Can we reuse existing parts?

What does this new part cost?

Is this requirement still valid?

Are we compliant EU AI Act & GDPR?

Reduce costs, improve quality

The hidden costs of not finding knowledge

€ 14k /y

Budget Burn

Ineffective search time reduces engineering capacity. Every missed answer is money spent twice.

Billion € Risk

Why take the risk?

Using old document rev. trigger major recalls. One mistake costs billions and destroys years of trust.

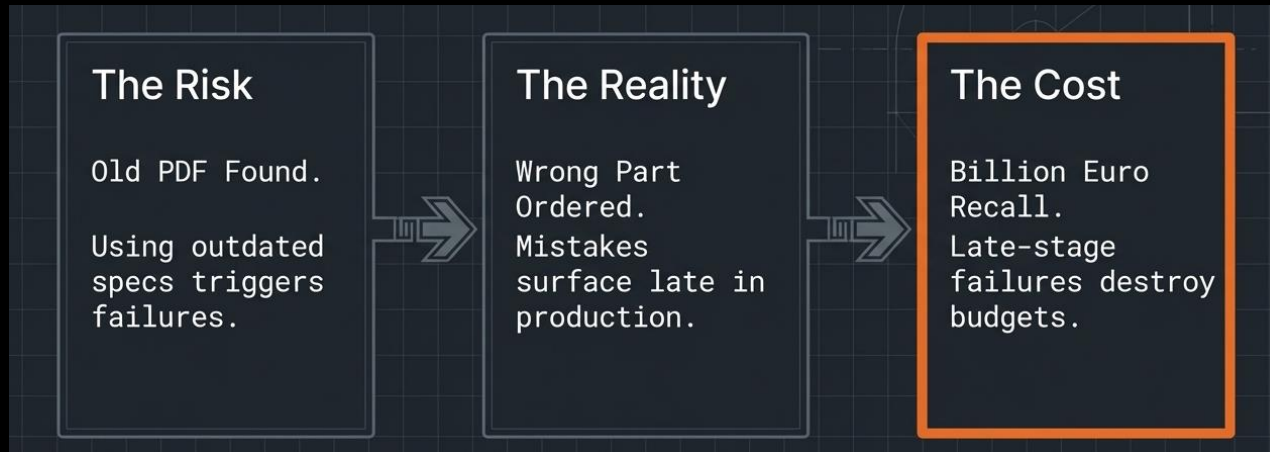

? €

Product Risk

Wrong specs lead to design flaws that surface too late. Late-stage failures are the most expensive ones.

One wrong document costs millions

Fastener failure - A billion-euro recall.

Find the right part – first time.

Reuse approved parts and save costs, reduce risk.

Output

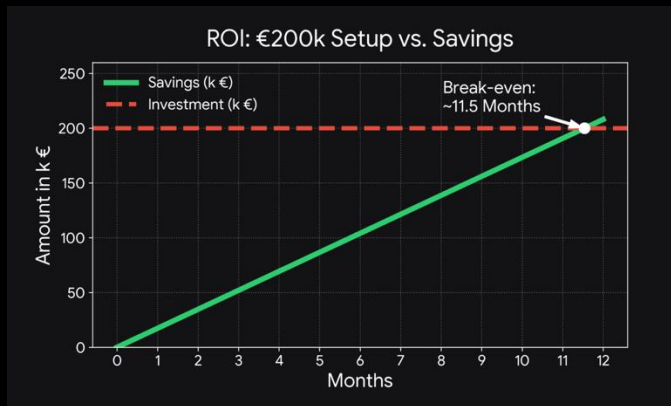

From Hidden Costs to Visible Profit.

Break-even within 12 months: Securing the budget and the products.

€200k

One-Time Setup Cost

€80k*+

Annual Savings

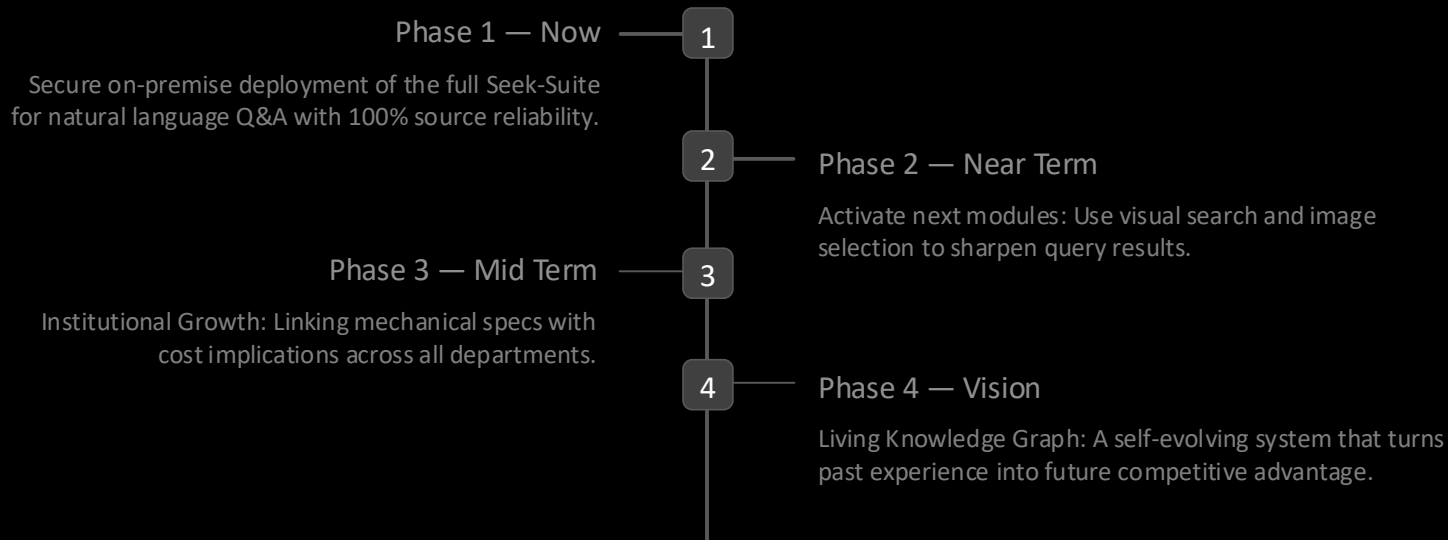

One-Time Setup Cost On-premise deployment: hardware + integration + configuration. No recurring SaaS fees. No cloud. No per-query costs.

10 engineers × 1 day/week saved × €400/day =
€208,000/year. Payback in under 3 months.

*10 Engineers × €14,300 (Annual Loss per Person) = €143,000 -> €143,000 × 56% (Target Efficiency Gain) = €80,080 Total Annual Savings.

The Evolution: From Search Tool to Corporate Brain.

Turning expertise into permanent institutional equity.

KnowSeek.Ai

The knowledge was always there.

Innovation needs focus. Don't drown in unstructured data

Find what you need and build the future.
